About Our Company

Going from strength to strength.

After being in the security business for over 17 years in Cyprus and 18 years in the UK Armstrong Private Security Ltd are still at the forefront of technology in the battle against crime. They use the latest technology and the most up to date methods to detect and deter crime against your property or business.

Over recent years crime in Cyprus has dramatically increased. It has also adapted to cope with some of the measures put in place to deter it. Gone are the days when simply closing your fly screen would keep the unwanted creatures out of your property. These days you have to stay one step ahead of the criminals or risk the consequences.

Armstrong Private Security Ltd has put all their technical knowledge and the years of experience to adapt to the changing ways the criminals attack your property. Sure, they offer the traditional high quality systems and service that is the signature of a quality security company. But now they have introduced new technical knowledge and ideas within the company to bring the systems that will provide a level of protection not seen before in Cyprus.

Armstrong Private Security Ltd have also addressed the high cost of security systems here to bring a range of systems that can be installed by you the home owner, with the systems ready programmed for your use and with the benefit of being able to access technical support and installation guides for all the aspects of the systems and installation it is a great for those on a budget or not wanting workmen in their property. If you subsequently find that you have bitten off more than you can chew. They can still help. They will complete the installations for you. Being fully licenced by the Cyprus police and with more experience than just about any security company in Cyprus you can't go wrong.

About Our Company

The company boasts a totally new website for 2019 where you can see the range of equipment and services on offer. It allows the purchase products and services for use in Cyprus or worldwide.

If you would like to see the systems and products on offer they can be found at www.armstrongsecurity.net or if you are one of those people like me that needs to touch the products and chat to a someone for advice, they have a shop in Kato Paphos where the range of equipment can be seen there on display. They have solutions for all security problems.

Alan Armstrong and Kevin Powell owners of Armstrong Private Security Ltd says "we are more than happy to help; Advice is free and with the many years of experience I am sure we can provide helpful information on any situation. We have new systems or upgrades that can be added to your existing security to make it tougher for the criminal to go undetected. The burglars of today are breaking into property for cash, jewellery and any other items they can get their hands on in a couple of minutes. Most of the systems will only alert you once a break-in has taken place. Sure your alarm system is a great deterrent and will let you know if a break-in occurs, but now we have systems to alert the owner as soon as a would-be burglar comes on the property. They give a heads up for the owner before any damage has been done. These systems are suitable for villas, apartments and many other locations. Call us, we will show you what can be done".

Armstrong Private Security Ltd is truly going from strength to strength in 2019.

Frequently Asked Questions

Can I still set the alarm if my pet is in the house?

Yes you can. Our systems are pet friendly and are there to protect your pets as well as you and your property.

What happens if my property were to lose power?

Our alarm system has a battery back up which can last a minimum of 8 hours, so your alarm will still work for over 8 hours without power.

What if I have an accident in my garden and cannot get back into the house?

No need to worry your medical button can work for up to approximately 100 metres from your property. So all you need to do is press your button and an ambulance will be sent to your property.

What happens if my alarm activates?

When your alarm activates, the monitoring station will immediately contact you act fast to get the service you require.

If your smoke/ heat detector were to activate the fire service would be deployed to your property.

If you were to press your medical button the paramedics would be deployed to your property.

If your intruder alarm was to activate Armstrong Private Security Ltd will respond to the activation by sending guarded response to your property.
